santhonydo@gmail.com

Pharm.D. healthcare AI solutions engineer who combines hands-on implementation with clinical workflow discovery, technical architecture, customer enablement, secure rollout, adoption, and measurable value realization.

CORE CAPABILITIES

Solutions	AI / Platform	Healthcare	Adoption
Discovery, architecture, demos, implementation, technical enablement, value realization	RAG, embeddings, agents, Next.js, TypeScript, FastAPI, Python, APIs, Docker	Epic EHR-derived data, HIPAA/PHI workflows, access governance, clinical informatics	Onboarding, training, SOPs, support, feedback loops, executive presentations

EXPERIENCE

HomeInsight AI — Founder / Full-Stack AI Engineer

Production AI workflow platform for real-estate professionals

01/2025–Present
SF Bay Area

Production OpenAI deployment: OpenAI-powered document analysis used by external real estate teams and businesses; ~400 registered users, 530 completed document analyses across 68 properties, 9,809 embedding chunks, and ~19-second median among 353 timed analyses.

- **Built and deployed HomeInsight AI for external real estate teams and businesses**, spanning AI document analysis, AI home-staging imagery, personal AI agents, listings, offer management, and client collaboration.
- **Owned founder-led adoption** through demos, onboarding, support, feedback calls, documentation, workflow translation, product iteration, and early paid customer activation.
- **Runs production OpenAI-powered document analysis** within a multi-provider architecture, combining the OpenAI API with PDF processing, RAG/embeddings, citation-backed workflows, and agent automation; also uses Codex daily across Hermes and other agent harnesses.
- **Translated recurring customer workflows into product decisions**, owning discovery, requirements, prioritization, hands-on delivery, instrumentation, support, and iterative improvement.

Kaiser Permanente NCAL — Clinical Data Analyst & Application Developer / Pharmacy

Technology Consultant

Regional clinical workflow engineering, deployment, governance, enablement, and value realization

12/2015–08/2021
06/2023–12/2023

Regional healthcare impact: 60+ pharmacists, 30+ skilled-nursing facilities, hundreds of weekly high-risk cases, HIPAA/PHI access governance, and estimated multi-million-dollar annualized savings.

- **Led multidisciplinary workflow discovery** with nurses, physicians, and pharmacists, then translated requirements into a regional patient-tracking and discharge workflow supporting medication reconciliation and PCP preparation for the first post-discharge visit.
- **Scaled a regional standard workflow** to 60+ pharmacists, 30+ skilled-nursing facilities, and hundreds of weekly high-risk cases across Kaiser Permanente Northern California.
- **Built KPI and value-realization dashboards** to track documentation, therapy changes, pharmacist time, PCP approval activity, adoption, and estimated multi-million-dollar annualized savings.
- **Led secure rollout and governance** with pharmacy, medical, technology, and data-access leaders on HIPAA/PHI safeguards, role-based access, SOPs, and training.

ADDITIONAL FOUNDER EXPERIENCE & CREDENTIALS

Recovered Health — Cofounder & CEO

Pharmacy logistics and compliance software

08/2021–10/2022

- Cofounded Recovered Health, which raised **~\$1M**; led product demos, investor/customer pitches, regulated workflow design, and healthcare operations across a **15-person team** with 5 direct reports.

Clinical AI: Built a generative-AI medication therapy management documentation tool for community pharmacies and advised pharmacy leaders on workflow automation and implementation.

Education & Credentials

Doctor of Pharmacy (Pharm.D.), Western University of Health Sciences

B.A., Molecular & Cell Biology, UC Berkeley

Certificate of Software Engineering, Coding Dojo

California Pharmacist License: RPH 67436

Earlier clinical: Kaiser Permanente Southern California — Outpatient Pharmacist, 12/2012–06/2015. Medication therapy management, patient counseling, and pharmacy workflow optimization.
